LEONARD H. GEMMILL
ENGINEERING LIBRARY
http://ucblibraries.colorado.edu/engineering
ENGINEERING STACKS: Bookshelves are on moveable tracks. The stacks above with bold lines are stationary. There are three moveable ranges between two stationary ranges. To operate: 1. Go to the stack group where your materials will be shelved, 2. Find the open aisle, make sure it is clear of people & step stools, 3. Press reset button and all lights in that moveable group will turn green, 4. Go to aisle you want to open, press arrow that points to the aisle to be opened.

SAFETY: A flexible plate is on one side, at the bottom of each moveable range. Touch this plate with your foot and the stack will stop moving instantly.

CIRCULATION: If the material is not on the shelf and Chinook indicates it is available ask for help at the Circulation Desk.

REFERENCE: If you need help locating appropriate materials for your topic or research area please ask for a librarian at the Info Desk.
