

APPENDIX G: Collection and Samples Size (as of 7/2005)

This table contains revised totals of item records for each location based on a Millennium statistical analysis. Since we could not obtain totals for local call numbers or Government Publications call numbers, we used a crosstab search by status codes:locations to obtain these totals.

We included all item records (by location) regardless of the call number system used and regardless of the status of the item record. The totals for some collections are very close to the numbers produced in the LC/Dewey summary we ran. However, the total for other locations such as Government Publications are much higher (and more accurate for those items that have been catalogued).

Several sub-locations are not included. For example, lockers, study carrels, the Dean's office, and similar locations were deleted.

Some of the sub-locations give us an indication of the type or size of the material (e.g. Art Folio, Business Microfilm, Government CD-Rom, and so on).

COLLECTION	SAMPLE SIZE	ALL CALL NUMBERS	SUBLOCS INCLUDED
ART	1,000	99925	ARTARC, CARREL, FOLIO, IN STORAGE REF, NORLIN BASEMENT, OFFICE, IN STORAGE, OVER, REF, STACKS
ARTBL	1,000	2303	BLUE ROOM
