

Charles DePuy Collection

Charles DePuy, Professor Emeritus of the Department of Chemistry and Biochemistry at the University of Colorado, received his Ph.D. from Yale University in 1953 and spent a decade as Professor at Iowa State University, before coming to the University of Colorado in 1964. He has made outstanding contributions to the field of physical organic chemistry and is well known for his work on gas phase ion chemistry. He has been the recipient of numerous honors and awards, including election as Alfred Sloan Fellow, 1960-64; NIH Senior Postdoctoral Fellow, 1969-70; Guggenheim Fellow, 1977-78; Fellow, American Society for the Advancement of Science; Alexander von Humboldt Fellow, 1988-89; election to the National Academy of Sciences, 1999; winner of the James Flack Norris Award in Physical Organic Chemistry awarded by the American Chemical Society, 2002; and election to the American Academy of Arts and Sciences in 2003. He retired from the University of Colorado in 1991. Professor Emeritus DePuy began this collection of over 150 works on chemistry in the 1960's and donated it to Special Collections, University Libraries, in 1986.

The collection, while not yet fully cataloged, is accessible. The Special Collections department's hours of operation are limited. Please check times by emailing spc@colorado.edu, calling 303-492-6144, or consulting the department's website at <http://ucblibraries.colorado.edu/specialcollections/index.htm>.
